> Write your code in the space, then test it in the Apps Script editor. Mark where it went wrong if it did.

Questions from the Guru Jazzy chapter page, for classroom use.

Practice tasks

1. **Club sign-up form** (Easy). Make a form that collects email, full name, class (drop-down), days available (checkboxes) and experience, and sends responses to the current spreadsheet.

2. **Lesson deck** (Medium). From an array of five agenda items, make a deck: a title slide, an agenda slide listing them all, then a section-header slide for each item after the first.

3. **Instant thank-you** (Medium). With `setCollectEmail(true)` on the sign-up form, change `onFormSubmit` so it emails the person who submitted (`e.response.getRespondentEmail()`) a thank-you with the days they chose.

4. **Feedback dashboard** (Challenge). Extend `summariseFeedback` to count the "What helped you most?" options and write the counts to a sheet. Add a chart from the sheet by hand and watch it update as responses arrive.
